Re: 137-15147-00014  
Notice-only change to  
137-14824-00014

Dear Mr. Armstrong:

Hill-Rom Company, Inc. was issued a registration on October 08, 2001 for the architectural products manufacturing plant. Pursuant to the provisions of 326 IAC 2-5.5-6 (d)(1) the registration is hereby revised as follows:

The issued registration contained a typographical error in the county identification number, therefore the registration number was changed from 127-14824-00014 to 137-14824-00014 to correct that error.

All other conditions of the registration shall remain unchanged and in effect. Please find attached a copy of the entire registration with the revisions made.

This decision is subject to the Indiana Administrative Orders and Procedures Act - IC 4-21.5-3-5. If you have any questions on this matter, please contact Ghassan Shalabi, at (800) 451-6027, press 0 and ask for Ghassan Shalabi or extension 3-0431, or dial (317) 233-0431.

Sincerely,

Re: Registered Construction and Operation Status,  
137-14824-00014, Notice-only 137-15147-00014

Dear Mr. Armstrong.:

The application from Hill-Rom Company, Inc., received on September 4, 2001, has been reviewed. Based on the data submitted and the provisions in 326 IAC 2-5.5, it has been determined that the following architectural products manufacturing plant, to be located at 11 South Walnut, Batesville, Indiana 47006, Indiana, is classified as registered:

- (a) One (1) Binks spray booth, identified as EU-01, using an electrostatic air atomized application systems with dry filter for overspray control, coating a maximum of 16.0 hospital wall units per hour, and exhausting to one (1) stack identified as S/V #1.
- (b) One (1) touch-up paint area, identified as EU-02, using an aerosol application system, coating a maximum of 16.0 hospital wall units per hour, and exhausting through building vents.
- (c) Miscellaneous source wide clean-up operations, identified as EU-04, using maximum of 1.26 pounds per hour of clean-up solvents, and exhausting to one (1) stack identified as S/V #1.
- (d) Woodworking operations, identified as EU-05, processing a maximum of 22.0 wood panels per hour, with one (1) cyclone for particulate control, exhausting at one (1) stack identified as S/V #2.
- (e) Welding and cutting of steel operation, identified as IA-02, and exhausting through building vents.
- (f) Twenty four (24) natural gas fired space heaters with a total heat input of 1.6 MMBtu/hr identified as IA-03.
- (g) Water and oil based cutting coolants, identified as IA-04, and exhausting through building vents.

The following conditions shall be applicable:

1. Pursuant to 326 IAC 5-1-2 (Opacity Limitations) except as provided in 326 IAC 5-1-3 (Temporary Alternative Opacity Limitations), opacity shall meet the following:
  - (a) Opacity shall not exceed an average of forty percent (40%) in any one (1) six (6) minute averaging period as determined in 326 IAC 5-1-4.
  - (b) Opacity shall not exceed sixty percent (60%) for more than a cumulative total of

15 minutes (60 readings) in a 6-hour period as measured according to 40 CFR 60, Appendix A, Method 9 or fifteen (15) one (1) minute nonoverlapping integrated averages for a continuous opacity monitor in a six (6) hour period.

2. Pursuant to 326 IAC 6-3-2 (Process Operations)

- (a) Pursuant to 326 IAC 6-3-2, the particulate matter (PM) from the woodworking operations (EU-05) shall not exceed 3.9 lb/hr and shall be limited by the equation given in subpart (e).
- (b) The cyclone shall be in operation at all times the woodworking operation (EU-05) is in operation, in order to comply with this limit.
- (c) Pursuant to 326 IAC 6-3-2, the particulate matter (PM) from the surface coating operations (EU-01) shall be limited by the equation given in subpart (e).
- (d) The dry filter shall be in operation at all times the surface coating operation (EU-01) is in operation, in order to comply with this limit.
- (e) Interpolation of the data for the process weight rate up to sixty thousand (60,000) pounds per hour shall be accomplished by use of the equation:

$$E = 4.10 P^{0.67} \quad \text{where } E = \text{rate of emission in pounds per hour and} \\ P = \text{process weight rate in tons per hour}$$

- 3. Any change or modification of any VOC emitting unit resulting in an increase of VOC emissions to 25 tons/yr or greater must be approved by the Office of Air Quality (OAQ) before such change may occur.

This registration is issued for the entire source, and shall supersede Federal Enforceable State Operating Permit (FESOP) issued on December 11, 1996 and its amendment issued on July 7, 2000. The source shall operate according to 326 IAC 2-5.5.

An authorized individual shall provide an annual notice to the Office of Air Quality that the source is in operation and in compliance with this registration pursuant to 326 IAC 2-5.5-4(a)(3). The annual notice shall be submitted to:

**Compliance Data Section  
Office of Air Quality  
100 North Senate Avenue  
P.O. Box 6015  
Indianapolis, IN 46206-6015**

no later than March 1 of each year, with the annual notice being submitted in the format attached.

An application or notification shall be submitted in accordance with 326 IAC 2 to the Office of Air Quality (OAQ) if the source proposes to construct new emission units, modify existing emission units, or otherwise modify the source.

Sincerely,
